MBSC EMBA · ECN 511 ECONOMICS FOR MANAGERS

Building King Salman Stadium: how much of the money stays in Saudi Arabia?

Construction and Infrastructure · **Topic B:** the multiplier effect of public capital spending, and where the money leaks

GROUP 8

Abdulmajeed Alajlan · Abdulrahman Aldahlawi · Salman Alfaris · Mohammed Alghamdi · Abdulaziz Alweheab · Nada Alyahya · Haifa Binnafisah

THE MAIN PRESENTATION

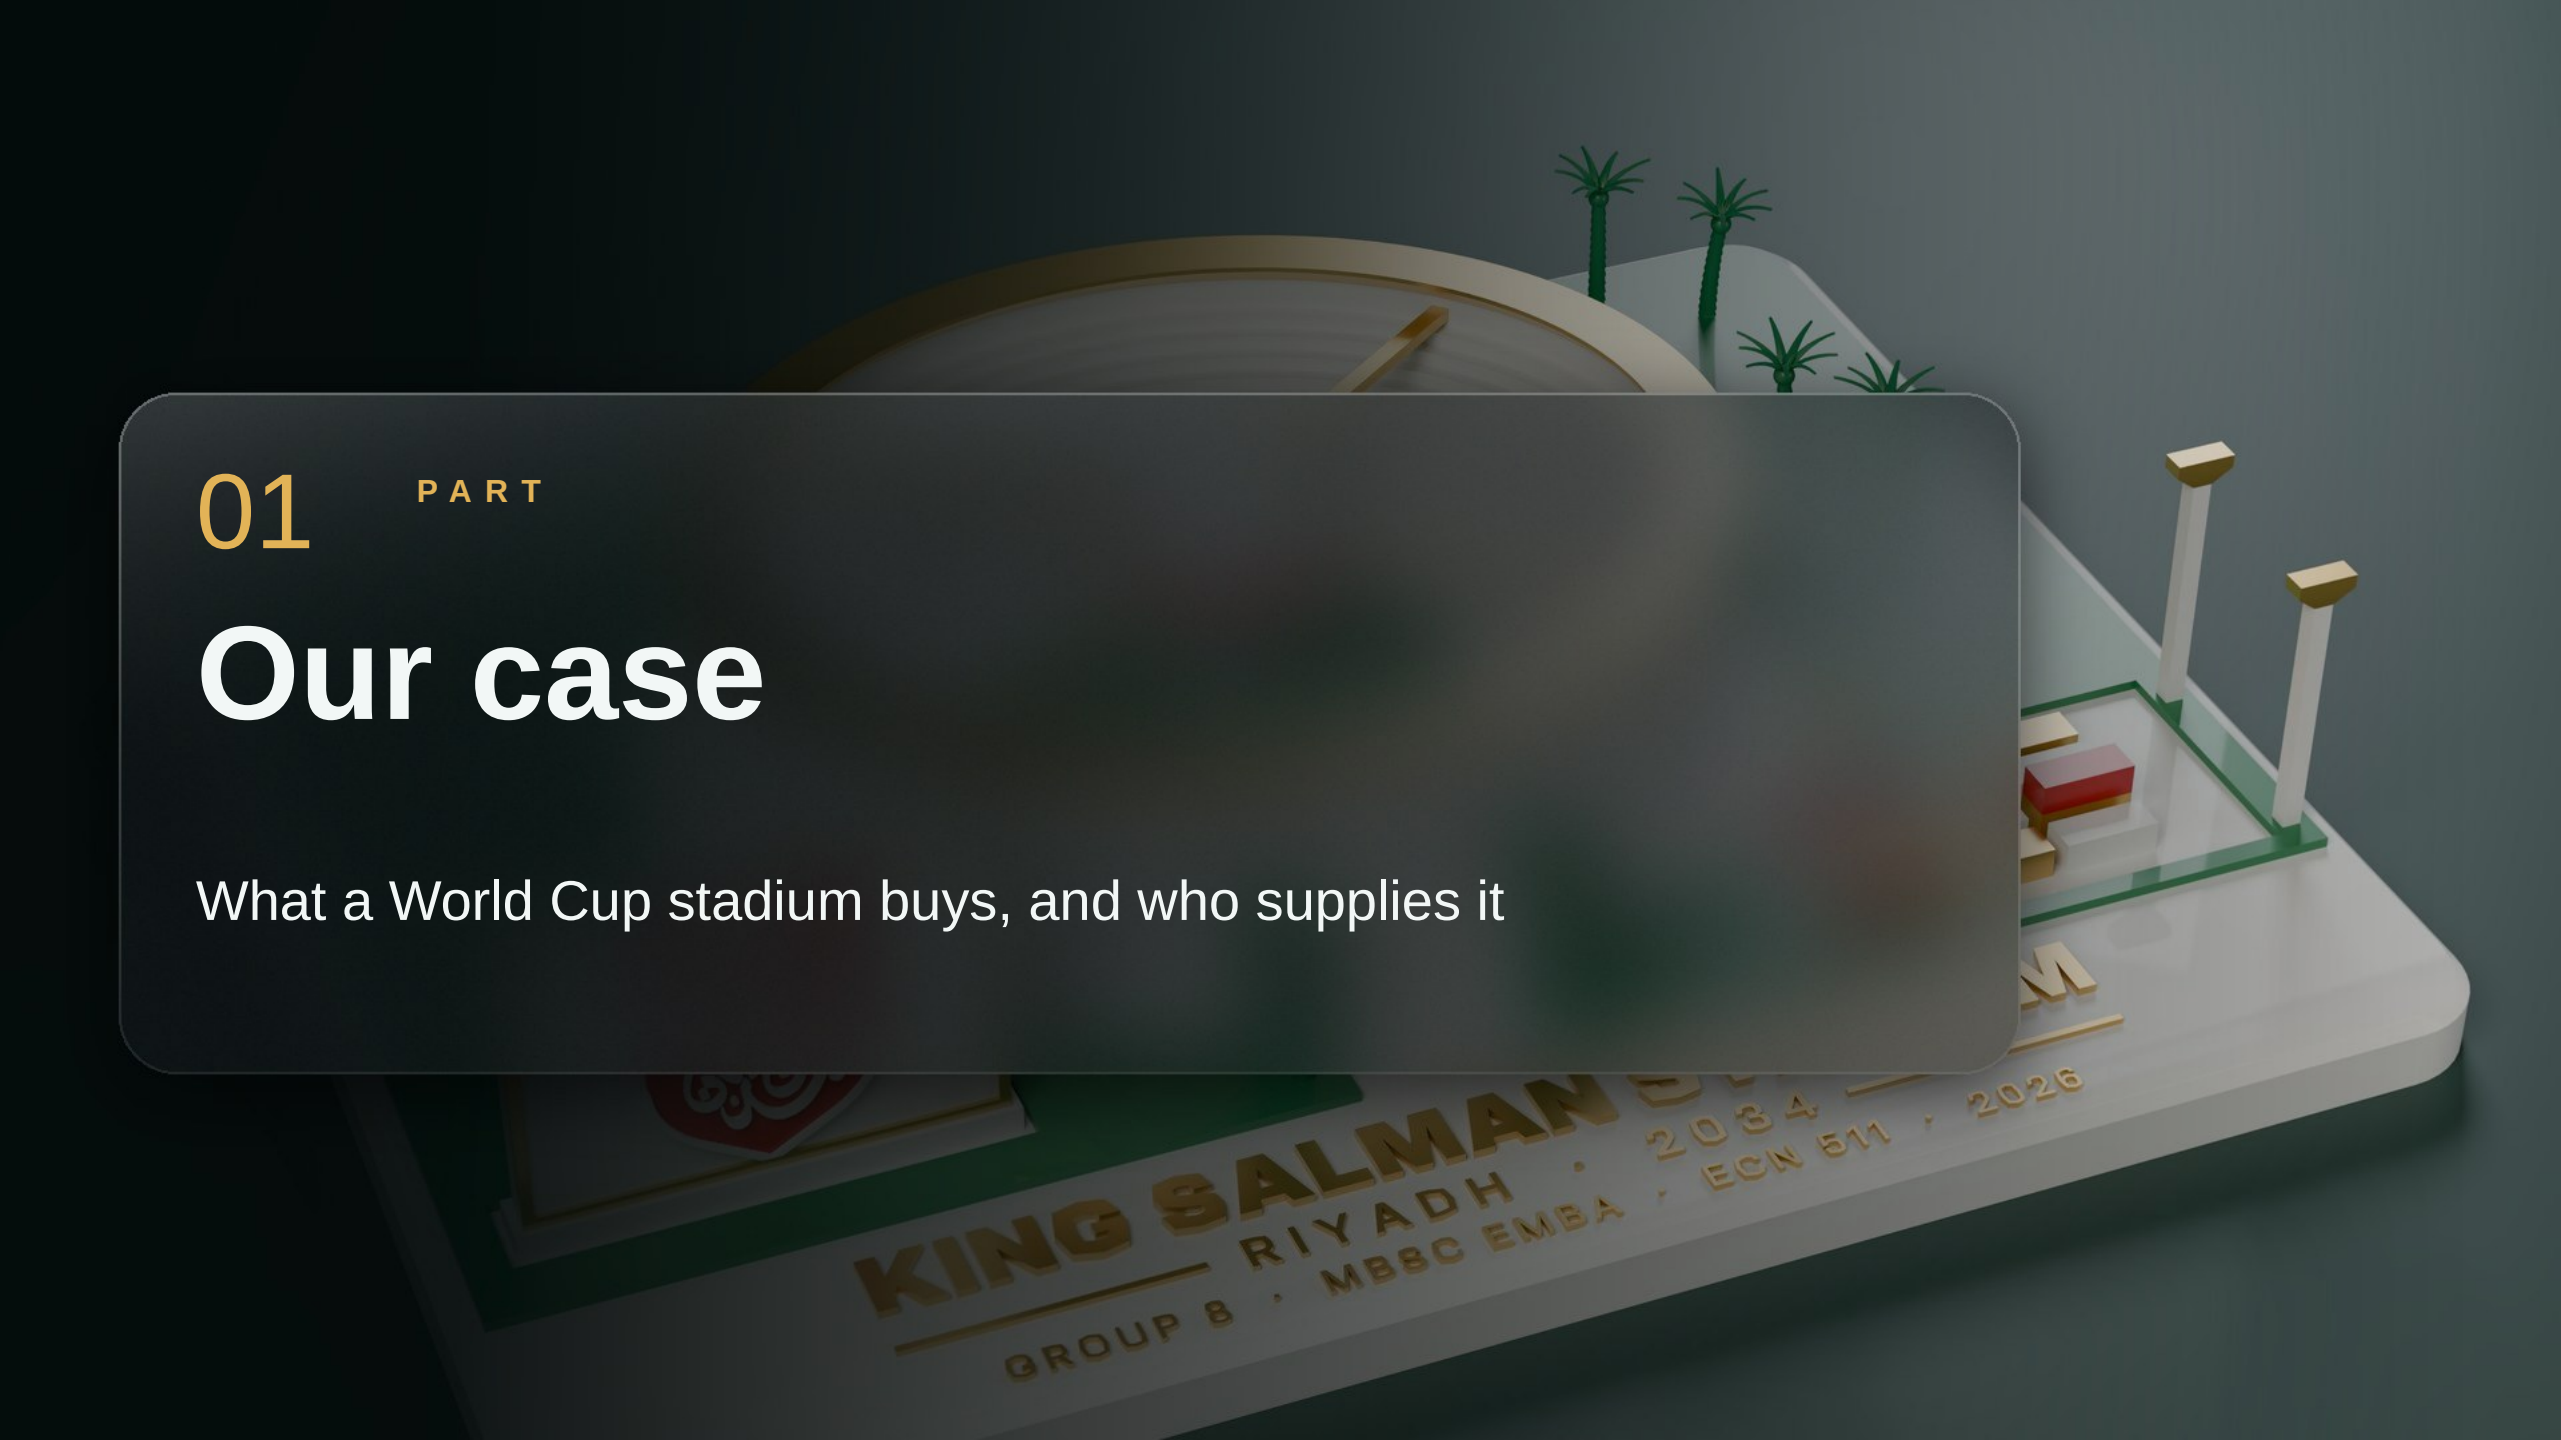
01 PART

Our case

What a World Cup stadium buys, and who supplies it



Our case: the 2034 World Cup stadium programme

A stadium buys civil works, materials, building systems and specialist expertise.

- → Ministry of Sport buys the works.
- → Populous designs the stadium.
- → Contractors and specialist suppliers deliver.

15
stadiums in 5 host cities

7.8%
of Saudi value added, 2023 sector scale

SAR 646bn
gross output, 2023

King Salman Stadium concept rendering © Populous

Sources: FIFA 2034 bid evaluation; GASTAT Supply and Use Tables 2023; Ministry of Sport; Populous [R01, R05, R02–R03, R53].

PART 1 · THE SECTOR

A World Cup stadium is a construction job inside a sector worth 7.8% of the Saudi economy

7.8%
of Saudi value added comes from construction (SAR 338bn of SAR 4,333bn, 2023)

SAR 646bn
construction output in 2023, of which SAR 307.5bn is bought-in inputs

15
stadiums across 5 host cities in FIFA's 2024 bid evaluation

92,760
planned seats at King Salman Stadium, Riyadh — our case

STADIUM	SEATS	WHO BUYS	WHO SUPPLIES	PUBLISHED VALUE
Prince Mohammed bin Salman Stadium, Qiddiya	45,000	Qiddiya Investment Co.	FCC (Spain) – Nesma (KSA); Elegancia: mechanical SAR 829m; IKK Fangda: facade SAR 997m ex-VAT	about SAR 4.0bn
Aramco Stadium, Al Khobar	46,096	Saudi Aramco	Besix (Belgium) – Albawani (KSA)	about SAR 3.7bn
King Salman Stadium, Riyadh — our case	92,760	Ministry of Sport	Main works prequalification notice (Nov 2025); design by Populous	Not published

International–Saudi joint ventures deliver the main works; **specialist imported systems arrive through subcontracts.**

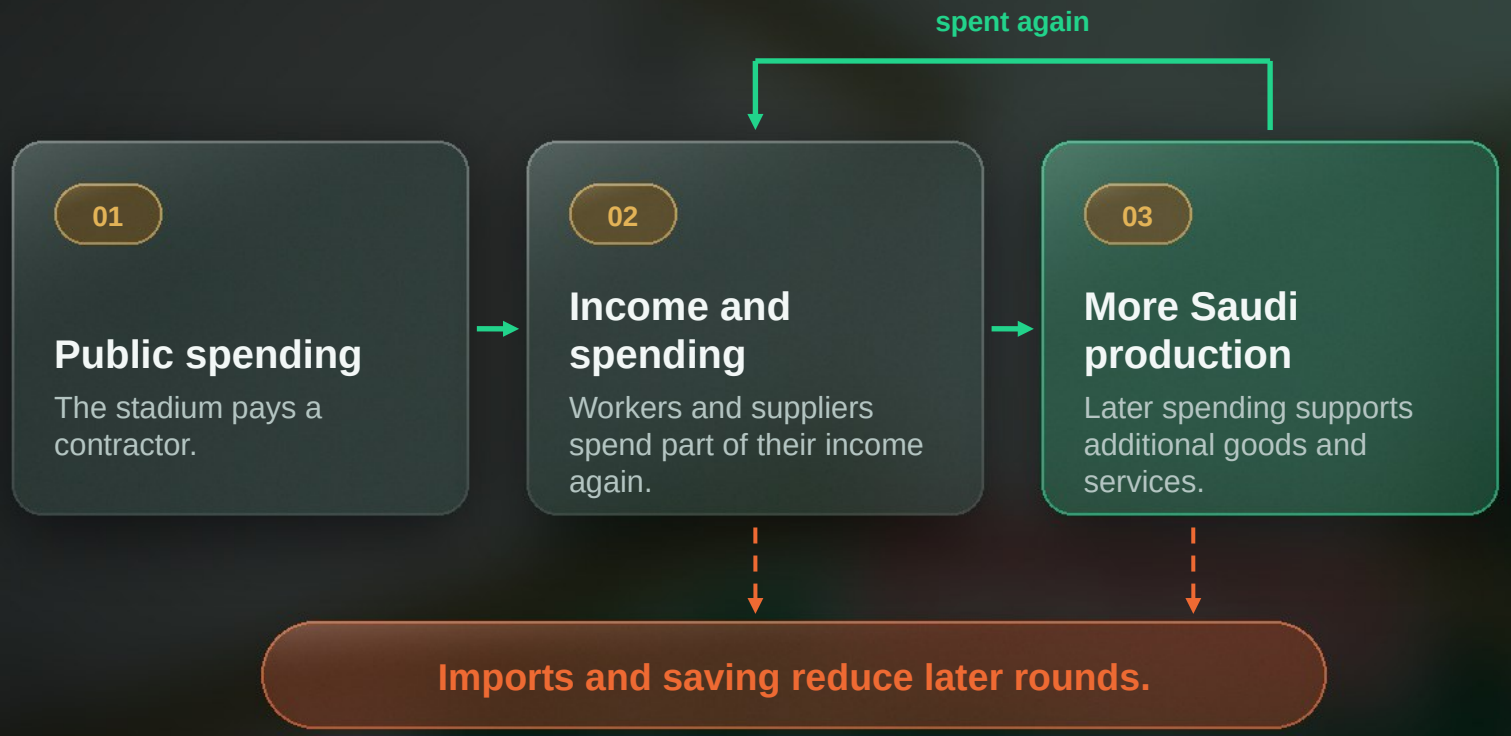
Sources: R05 (sheet 6.3), R01, R02–R03, R57, R58, R23–R24. Calculation: construction gross value added 338.3bn ÷ total GVA 4,332.9bn = 7.81% (GASTAT 2023, sheet 6.3).

02 PART

Multiplier and leakage

Follow the riyal: where it is spent, and where it leaks

One public payment creates income that people spend again



GDP multiplier = extra GDP caused ÷ extra public spending

Illustration: SAR 100m extra spending causes SAR 120m extra GDP. **Multiplier = 1.2.**

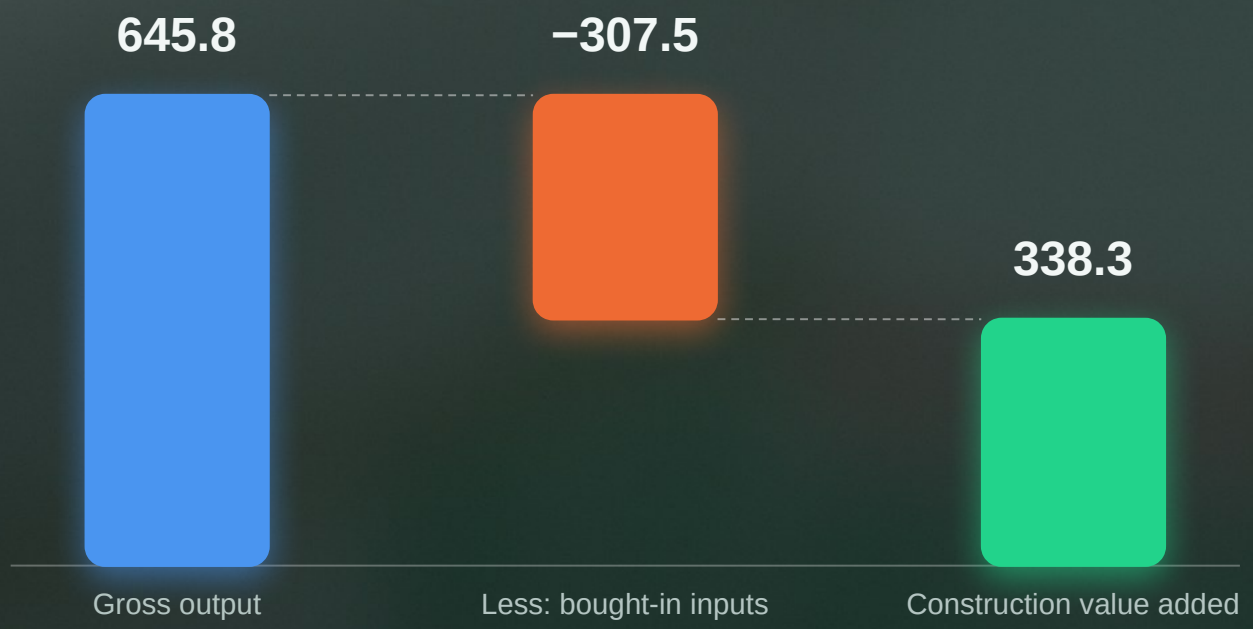
MICRO	A firm chooses a supplier.
MACRO	The combined effect on GDP.
OUR TOPIC	The spending multiplier is macroeconomics.

Source: IMF, Fiscal Multipliers, 2014, section II [R69]. Teaching example, not a Saudi estimate.

Our sector creates assets and adds value through Saudi production

GASTAT 2023 [R05]

Saudi construction, 2023 — SAR billion



7.8%

of Saudi gross value added

GDP counts the extra value created at each Saudi stage **once**. A local supplier's full invoice also includes inputs bought from other firms.

Academy link: qualified local suppliers can win orders and create extra Saudi value.

Source: GASTAT, Supply and Use Tables 2023, sheets 6.2–6.3 [R05]. Sector share describes scale, not a GDP multiplier.

PART 1 · HOW IMPORT-DEPENDENT IT IS

Construction’s two most imported inputs: basic metals (54.5%) and electrical machinery (50.3%)

SAR 646bn construction output in 2023, of which SAR 307.5bn is bought-in inputs

Imported 19.7% · SAR 60.5bn | Made in Saudi Arabia 80.3% · SAR 247.0bn

IMPORT LEAKAGE BY INPUT — AS A SHARE AND AS AN AMOUNT (CONSTRUCTION, 2023)

Metals and electrical machinery are half imported; **by amount, chemical products and metals are the largest leaks.**

Source: GASTAT, Supply and Use Tables 2023 [R05] — use: sheet 6.2 col. H; import rate: sheet 6.1 Total imports (AA) ÷ Supply at basic prices (AB). National ratios applied to construction purchases.

Applying a SAR 4.5bn stadium scenario

about SAR 4.0bn

Qiddiya stadium · 45,000 seats

about SAR 3.7bn

Aramco Stadium · 46,096 seats

SAR 4.5bn

Group scenario, not a published budget or a validated cost estimate

ROUND 1

Estimated purchases using GASTAT 2023 construction ratios

SAR 2,143m total purchases = 47.6% of the SAR 4.5bn

SAR 1,721m Purchases inside Saudi Arabia (80.3%) → next spending round

SAR 421m Purchases from abroad (19.7%) — the first leak

Sources: R57, R58 (benchmarks); GASTAT Supply and Use Tables 2023, sheets 6.1–6.2 [R05]. Group scenario using national ratios; figures are rounded.

Estimated imports in the SAR 4.5bn stadium scenario

STADIUM IMPORTS

SAR 421m

19.7% of the SAR 2,143m estimated purchases split by input

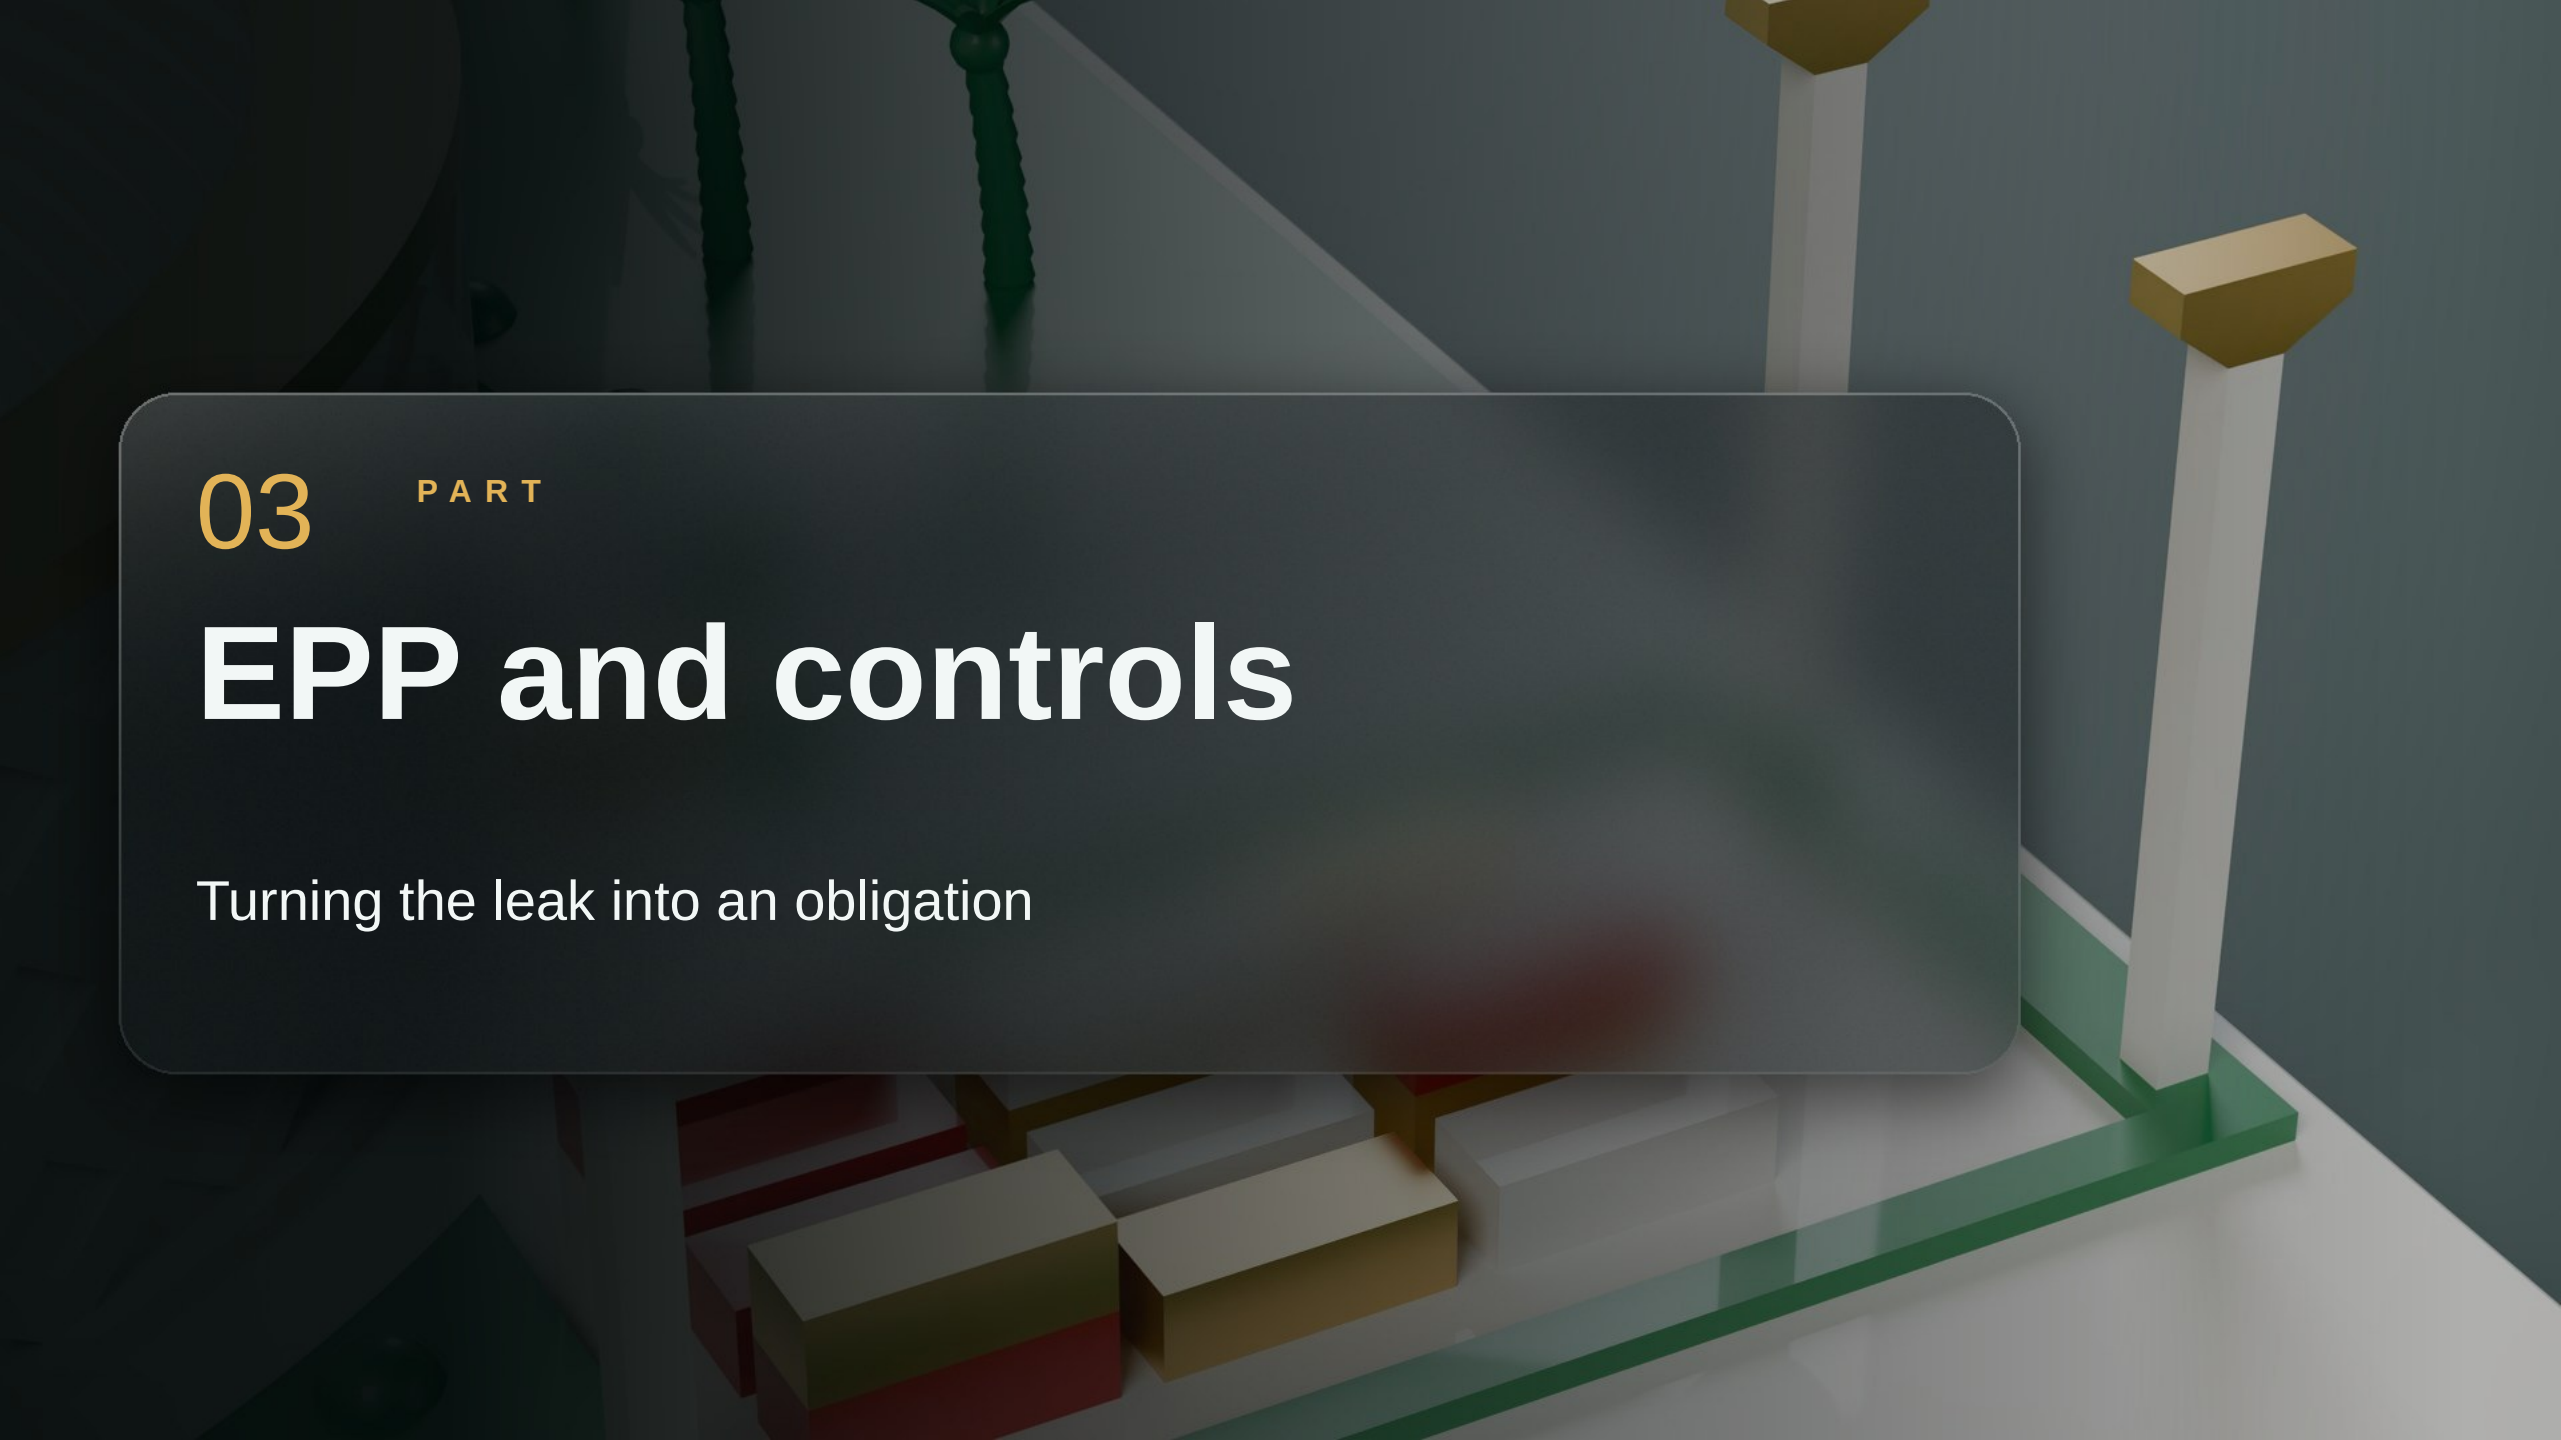
SAR 177m

Chemicals + metals · 42% of stadium's imports

ACTUAL ITEM CHECK

Grade, quantity, origin, certification and price from supplier schedules.

Examples under each group are illustrative. Each bar retains its whole GASTAT group value. Source: GASTAT, Supply and Use Tables 2023, sheets 6.1–6.2 [R05]. National product ratios applied to construction use; group scenario, not invoices.



03 PART

EPP and controls

Turning the leak into an obligation

Assessment basis: the official April 2026 consultation framework

SAR 421m
Estimated stadium imports · SAR 4.5bn scenario, slide 5

×

20%
Second import tier · SAR 300m–500m per tender

=

SAR 84m
Required EP credit · 421m × 20%

IMPORT TIERS (PER TENDER) AND THE EP OBLIGATION

DRAFT CATEGORY FACTORS

Knowledge transfer / localisation **1–3**
Technology transfer / exports **2–4**

4 + 2 = 6

Qualifying base + approved bonus. Rare technology or other eligible grounds.

Assumption: one main contract with one company, so all SAR 421m counts.

Credit differs from cash, GDP and ROI.

Source: LCGPA, Economic Participation Policy Update, consultation text, Articles 6–9 [R63]; DGA Group, April 2026. Imports: group scenario [R05]. Actual tender terms control the applicable version.

A fixed event deadline made live-site learning especially valuable

3,000+

training places

408

apprentices

✓ WHAT WORKED

Training connected to **real construction jobs**.

▲ WHAT WAS WEAKER

Encouragement **without binding targets** made skills objectives harder.

Saudi adaptation: paid practice, independent tests and a return-to-train commitment

Sources: UK DCMS, 2012 Games construction on track, 20 May 2012 [R12]; Crossrail Learning Legacy, 2018 [R13]. Counts do not prove retained jobs.

Five risks, five controls

	RISK		PROPOSED CONTROL
1	**Routine training earns extra credit**	→	Record existing duties. Fund new competence, rights or tooling.
2	**IP cannot be used independently**	→	Agree licences, diagnostic access, trainer rights and export territory.
3	**Shared delivery duplicates claims**	→	Keep each supplier’s approved activities, cost allocation and ledger separate.
4	**Local substitutes or bulk buying fail**	→	Test grades, capacity and full cost. Use fair lots and multiple suppliers.
5	**Skills have no work after handover**	→	Confirm placements before training and contract the next site.

EVIDENCE AT THREE POINTS

- **Before** — baseline and rights
- **Completion** — independent tests
- **6 / 12 months** — work and trainer return

Sources: LCGPA consultation Arts. 8(3), 13–16 [R63]; WIPO licensing [R64]; OECD competition safeguards [R68]; UK additionality study [R54].

04 PART

The academy proposal

Turning the obligation into Saudi capability

Shared delivery across eligible stadium suppliers, with separate EP obligations

Shared EPP proposal: eligible stadium vendors jointly fund ONE academy. Each vendor contributes approved funding, trainers, equipment or licensed know-how.

01 License and train

- Licensed manuals and software
- HVAC rigs and coating-test kits
- Paid practice and Saudi trainers

Evidence: NITI training; WIPO licensing terms

02 Qualify Saudi materials

- Coatings, sealants and metals
- Test specific grades and origin
- Material passports for approvals

Evidence: ALUPCO extrusion; Sika Saudi admixture production

03 Buy together

- Common performance specifications
- Competitive framework and call-offs
- Verify discounts and full cost

Evidence: OECD purchasing efficiency and competition

One qualified host runs the programme. Sharing trainers, equipment and demand reduces duplicated training and keeps skills available across sites.

LCGPA approves vendor roles and cost allocations. **Each vendor keeps its own EP obligation and ledger. Each activity earns credit once.**

Later: export Saudi-owned courses, licensed services and qualified products.

Sources: NITI [R42]; official LCGPA draft Arts. 8–9 [R63]; WIPO [R64]; OECD [R65, R68]; ALUPCO [R66]; Sika [R67]. Candidate capabilities, not partner commitments.

Begin inside real projects with an existing qualified training provider

Joint agreement first: vendor commitments, LCGPA-approved activities and separate credit records.

1 Confirm demand

Employers identify the skills gap and sign paid site placements. Vendor roles and funding are agreed.

CONDITION TO PROCEED
Next-site work, budget, IP rights, tools and approvals are confirmed. Signed licences and EP cost allocations.

→

2 Run the pilot

Supplier mentors teach on real equipment. Independent tests and trainer practice. Saudi trainers teach the next cohort.

CONDITION TO PROCEED
Verify practical competence, paid deployment and unit cost. Record extra capability beyond routine duties.

→

3 Expand if proven

Repeat cohorts build an academy. A permanent facility needs its own case. Use existing facilities where adequate.

CONDITION TO PROCEED
Continuing jobs and orders, proven results and acceptable quality and cost. Track work and trainer return at 6/12 months.

No confirmed paid demand: defer intake. Weak results: redesign or stop.

Suggested start: **24 learners, 6 trainer candidates, 2 eligible sites.** Targets for agreement.

Basis: report Sections 5–8 and Appendix F. Sources: NITI [R42], training evaluation [R54], LCGPA draft [R63], WIPO [R64]. Proposed design.

What stays after the cranes leave

VALUE	DURING CONSTRUCTION	AFTER HANDOVER
Skills and academic capability	Paid practice, independent tests, manuals and trainer development	Next-site work, returning trainers and further recognised qualifications
Local products and IP	Approved local grades, tooling and usable technical rights	Repeat orders, deeper production and independent Saudi services
Buyer value	Joint offers, less duplicated buying and comparable full-cost prices	Reusable specifications and resilient multi-supplier sourcing
Export value	Saudi-authored content and rights prepared for later markets	Paid courses, licensed services and qualified products sold abroad

ILLUSTRATIVE MATERIALS OPPORTUNITY **25% of the SAR 177m basket ≈ SAR 44m more domestic purchases**

Source: GASTAT-based group scenario [R05]. Benefits are proposals. No discount or export revenue is assumed. Domestic purchases, savings and credit are separate.

A shared Materials and Systems Academy pilot

Proposed joint programme for all participating eligible stadium vendors · one academy, agreed vendor contributions and individual compliance records.

LCGPA

Approve extra activities, rights, factors and separate supplier ledgers.

AUTHORISED BUYER

Approve competitive joint procurement and construction gates.

DELIVERY PARTNERS

Agree paid placements, material trials, trainer return and follow-up.

EP CREDIT PLAN

SAR 84m from about SAR 36m of activity (average factor 2.33; SAR 63m at low-end factors)

SAR 84m

EP credit = 36 + 24 + 24

Why these factors: LCGPA sets the final factor within each draft range. We start at the minimum and add 1 per condition met: usable licences (2→3), new skills with independent tests (1→2), approved Saudi materials with real orders (1→2). Not the maximum: no manufacturing rights, recognised qualification or new plant.

Proposed start: 24 learners, 6 trainer candidates, 2 confirmed eligible sites

Proposal targets for agreement, not forecasts or observed results. Scale on proven skills, demand, quality, cost and licensed rights. Policy basis: LCGPA [R63].
